

HALO 4 NOTES

Protagonist

The Librarian (deceased)

↳ wants humanity to ascend to the "unstable"

However

↳ Results sourced to the stored personalities fragmented → attempts to return them to biological states created only abominations of former selves.

Cost → Moral implications of this process were lost on the Didact.

⊙ Since the Flood only assimilate LIVING tissue, the Composer would afford the Didact a solution to revenge against humanity.

PROMETHEANS ARE HUMANS

- Didact would have encrypted the entire race if Forerunners had not removed the Composer from his cage & imprisoned him on Requiem.

When Librarian indexed mankind for repopulation, she hid seeds from the Didact which would lead to the eventuality → MASTER CHIEF.

- "the culmination of a thousand lifetimes of planning"

- Has a "Gen" which was placed in him by the

Librarian herself → one trait is an immunity to the Composer

↳ must be unlocked → by accelerating evolutionary journey.

Antagonist

The Didact

- Seeks the Composer

- Will allow him to contain the greatest enemy faced by the Forerunners → Man

History of Man (Librarian)

• Spread abruptly & violently throughout the stars until the Didact & his troops arose to quell the fighting.

- Man was not simply expanding, they were running → from the Flood.

• Flood exterminates Forerunners

- they make plans for final great journey, but Didact refuses to yield to mantle of responsibility

↳ would save all life in the galaxy at a cost

In Forerunners' quest for transcendence, the Composer had been intended to bridge the organic & digital realms & thus make them immortal.

Ways to Tie in Commander Prime

Halsey is obsessed with creating the "ideal soldier"

→ After the creation of the Spartan III's, she came across the planet Requiem.

In her research, she stumbles upon a process known as "Brevet Mutation", which was an accelerated biological maturation that the Forerunners utilized.

→ Rather than alert her superiors of the discovery, she continues her research in the dark, gathering as much information about Promethean culture as she could.

↳ On returning to Reach, she covered her tracks well by saying her slipspace drive had ruptured & the resultant EMP had blocked communications for the past month, forcing her to seal herself in cryo.

→ She continues her research simultaneously with the decryption of the data at Babel-Cathia, the Forerunner ship on Reach.

The radiation was one source of emission, & though subtle enough to elude human technology, it easily pinpointed & tracked by the Forerunner ship.

↓
On cross-referencing the data from Requiem with that present at Babel-Cathia, she discovers a link to a specific strain of radiation only present in those that bear a unique gene; the gene was formulated by a direct combination of the genetics of the Librarian & the Didact.

↳ Halsey deduces that if any lifeform could survive the Brevet Mutation, this was it.

→ She seeks out the source of the radiation, & discovers that it is coming from a baby human boy named Hyperion.

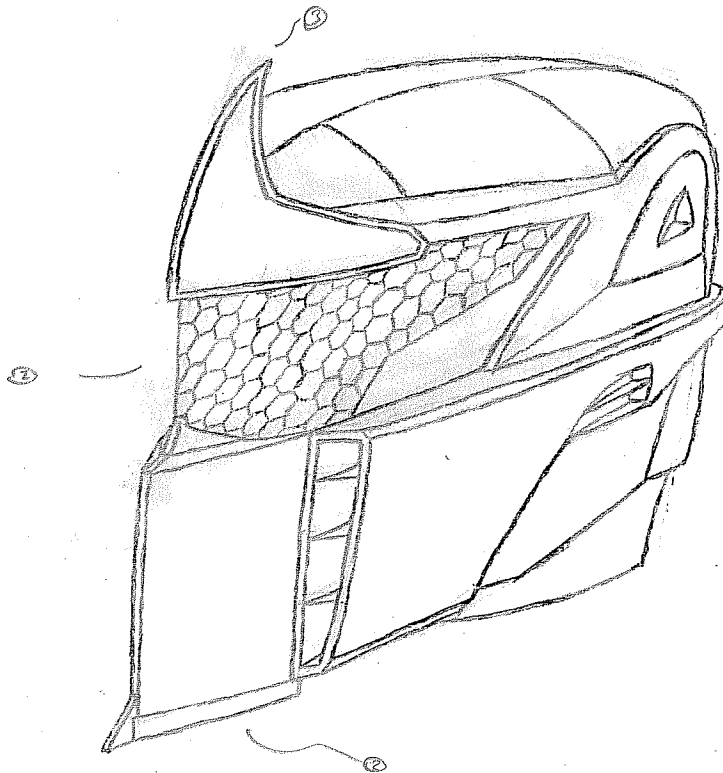

As the boy grew, Halsey continued & perfected her research. The data she secretly gained on Requiem completed that present on the ship at Babel-Cathia. It allowed her to manipulate the process so that Hyperion could survive it.

← As he grows older, Halsey begins to see the gene set work, as Hyperion grows to the massive size of 7 feet tall & 300lb of muscle. Despite his intimidating stature, Hyperion is surprisingly docile & considerate, however is supremely protective of that he holds dear. He soon joins the military at the age of 18 to provide his services against the increasing Covenant threat (2545).

Commander Prime

To do this Hulsey heavily modifies the equipment
& server used in the Spartan program. Opling
to try a direct genetic splice of hyperant
DNA with Promethium technology

HELMET RENDITION #2

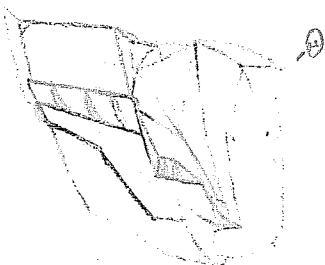

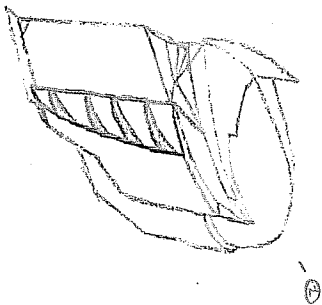

① Hexagonal texturing on visor - electromagnetic arc energy

② Faceplate - retracts when speaking

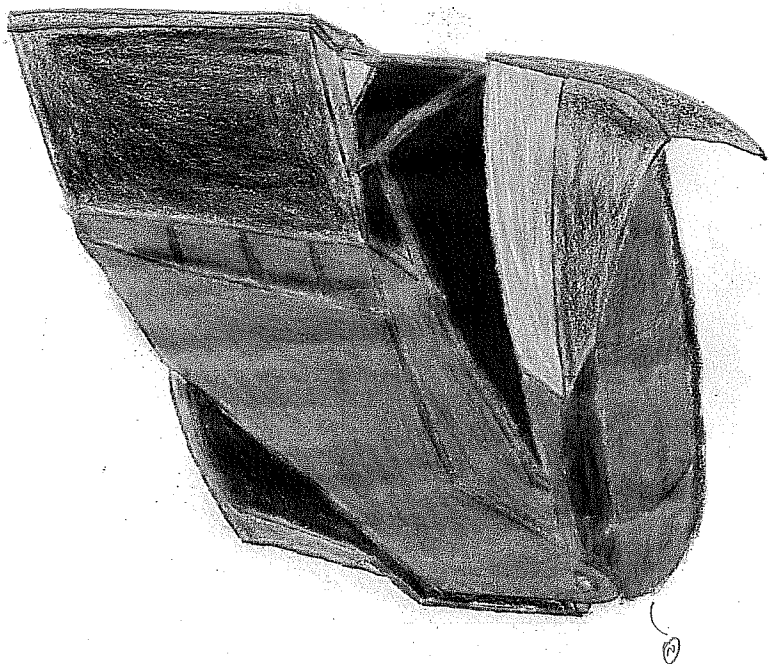

③ Gave him a "crown" - going for a more regal look

Illustrations: Helmet

- ① Alternative Helmet Configuration
- ② Luminous reds still not the color I am looking for. About more of a deep, luminous crimson, almost blood red.

HELMET RENDITION #1

CHEST ARMOR KENDITION #1

① Inspired by the Venator armor in Halo 4.

② This is a surprise for later things to come...

↳ glowing with arc energy (light blue). Think Tony Stark but more futuristic

③ Still leaving how to draw the (in)herent body

↳ LOL! Get it?

Because lies... old universal
